

Qwickr
SEE THE INVISIBLE

THE MOST EFFECTIVE SEARCH TOOL FOR OFFICE 365 & SHAREPOINT

Do you store and manage information in Office 365, SharePoint or OneDrive for Business?

Search documents and emails easily and get results quickly with Qwickr. Preview content, sort and refine results to see search results organised in a way they make sense to you. With the Microsoft Office integration you can easily start working. Simply start Qwickr to search for information and act on that accordingly.

Key Features

- Instant preview of commonly used file types;
- Fast and unique preview functionality for emails;
- Special Grid View to filter, sort and group large result sets;
- Full Microsoft Office integration to instantly open and edit files from search results or set/adjust Document Properties;
- Save search actions for easy re-use;
- Full support of SharePoint Search Scopes;
- Easily share results with others via email;
- Track changes of search results during a specific time range;
- Define specific company or departmental searches.

Advanced Configuration

Qwickr can be configured extensively to meet different user requirements.

Settings include:

- Multilanguage support (English, Dutch, German);
- Definition of personalised hot-keys to initiate search;
- Re-sizeable preview and result panes;
- Registry settings to support easy company-wide deployments;
- Many settings to share results via email in different ways.

Support & Services

Transform Data International can help speed up your succes and help you get the most from your Qwickr:

- Support with software packaging & deployment;
- SharePoint search center configuration;
- Consultation on product suite.

Intapp Documents

Qwickr is fully integrated in Intapp Documents and Custodian. This integration provides the following functionality to end-users:

- Launch Qwickr from within Outlook;
- Right Click - Search from here... and limit your search to a specific location;
- Send "Lookup with Qwickr" links so others can easy lookup a shared document;
- Open the location of the search result within Outlook (Intapp location).

Qwickr allows other applications to launch Qwickr with a search term and further arguments.

Typically use-cases for integrations are Web Applications, Email Links, Browser Extensions and Desktop Applications.
