

# THE MICROSOFT TEAMS & WEB CLIENT FOR INTAPP COLLABORATION & CONTENT

Do you use Intapp Collaboration & Content from within Outlook and do you want more? What if you could use MS Teams as your front-end and be able to work on any device anywhere?

Workhub is a full featured web client that seamlessly integrates Intapp C&C into MS Teams.

Because of its compatible web UI, it works on any device, even on Mac.

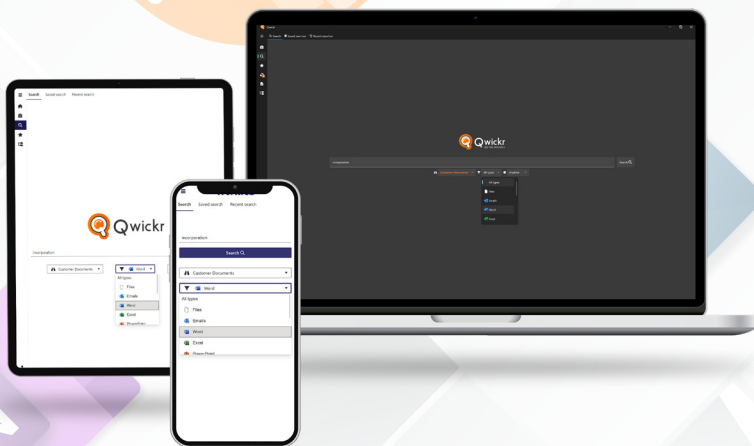

Workhub offers an alternative, modern UI to Outlook providing maximum screen real estate to complete your everyday tasks. Navigating your matters, cases, projects etc. and previewing content has never been easier.

## Key features

- **Landing page**  
Provides favorites, tasks, recent content and key insights at a glance.
- **Supports Intapp Documents Workspaces list (pin/unpin)**  
Access your matter list, including the ability to lock and unlock items, as in Outlook.
- **Smart browsing**  
Navigate your workspaces, preview content, access metadata and apply actions
- **Basic full text search**  
Quickly find any type of document and take immediate action.
- **Manage your OneDrive sync**  
Make shortcuts in Windows Explorer/Finder for quick access and/or offline use.
- **Central locations**  
Make shortcuts for sharing know-how or documents.
- **BI reports**  
Easily embed BI reports and overviews to your landing page.

## Good to know
